Junior Web Developer

I am a web developer with strong knowledge in JavaScript, HTML, CSS, Python, and React, and two years of experience at Marelli. Throughout my career, I have worked on optimizing processes in logistics, maintenance, production, and product engineering by automating tasks, developing tools to streamline internal processes, and managing data efficiently.

WORK EXPERIENCE

CHICK FIL A • Toronto, ON • 03/2024 - Present
Back of house team member

- Worked with people from various cultural backgrounds to create a positive and inclusive work environment.
- Trained new employees, cooked, and assembled dishes.
- Maintained cleanliness, organization, and managed inventory and supplies.

MARELLI AUTOMOTIVE SYSTEMS INDUSTRY AND COMMERCE BRAZIL • Hortolândia, SP • 02/2022 – 12/2023
One of the world's largest suppliers of automotive parts.
STUDENT INTERNSHIP

- Development of dashboards in Power BI including Production KPIs, Maintenance KPIs, Painting parameter control, and Stock control automation in SAP using VBA.
- Increased operation efficiency by up to 85% through automation of operations in SAP.
- Tasks included spare parts registration, supplier registration changes, and data collection for already registered items.

EDUCATION

Diploma in Web Development
Tamwood College • Vancouver, BC

Mechanical Engineering
University of Campinas • Campinas

Mechanical Technician
Etec Getúlio Vargas

PROJECTS

Shopping Web Site Using React
This website simulates an e-commerce platform. Users can search for products, add/remove items from the shopping cart, and view items. Applied knowledge of

components, conditional rendering, useState, and useReducer.

My Portfolio using JavaScript
Created a responsive portfolio using HTML, CSS, and JavaScript. Fetched data from a JSON file on GitHub.

SKILLS

Clean Code, CSS, English, HTML, Japanese, JavaScript, OOP, Portuguese, Power BI, Python, React, Spanish, SQL, VBA
